SKILLS

Languages:	Java , C++, Python, JavaScript
Tools/Platforms:	MongoDB, MySQL
Soft Skills:	Problem-Solving, Team Work, Project Management, Adaptability

TRAINING

Board Infinity	Jun' 24 – Jul' 24
Web Development	
- Completed an intensive course covering HTML, CSS, JavaScript, and Bootstrap. - Learned jQuery for dynamic web interactions, including selectors, events, effects, animations, and AJAX. - Gained hands-on experience with DOM manipulation, event handling, APIs, and asynchronous programming. - Worked with modern JavaScript frameworks and libraries.	

PROJECTS

Food Ordering System <i>Java Project, Responsive UI Application</i>	May' 24
- Developed a user-friendly Food Ordering System as a standalone Java application using Swing components, streamlining the food ordering process with a responsive and visually intuitive interface. - Engineered functionality for capturing customer information, enabling users to input and validate personal details before proceeding with order placement to ensure accurate order processing. - Implemented an interactive menu selection system allowing users to browse food items, select desired quantities, and view real-time order summaries, enhancing the overall user experience.	
Car Showroom management System <i>HTML,CSS, JavaScript, Responsive Website</i>	Nov' 23
- Developed a comprehensive Car Showroom Management System featuring dual interfaces—an Admin Panel for showroom managers and a Customer Panel for prospective buyers. - Enabled admins to efficiently monitor car inventory, manage stock levels, and track sales analytics in real time, improving inventory visibility and decision-making accuracy by 45%. - Designed an interactive customer interface allowing users to explore car listings, view detailed specifications, and book test drives seamlessly, resulting in a 50% increase in lead conversions.	
Emergency Ambulance System <i>React, Responsive Website</i>	Apr' 23
- Engineered a responsive Emergency Ambulance Booking System in real-time across various categories—including Basic, Standard, Life Support, and Airlift—based on the urgency. - Integrated live GPS tracking to enable real-time monitoring of ambulance location, allowing users and hospitals to track estimated arrival time accurately and improving emergency response coordination by 40%. - Designed a seamless UI/UX to facilitate quick ambulance booking, selection of ambulance type, and real-time status updates, reducing booking time and improving user satisfaction.	

CERTIFICATES

Server-Side JavaScript with Node.js <i>Coursera</i>	Apr' 24
Mastering Data Structures & Algorithms using C and C++ <i>Udemy</i>	Nov' 23
Object-Oriented C++: Inheritance and Encapsulation <i>Coursera</i>	Nov' 23
The Bits and Bytes of Computer Networking <i>Google</i>	Nov' 23

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology	Aug' 22– Present
Computer Science and Engineering; CGPA: 7.03	
D.A.V Public School, Hehal	Ranchi, Jharkhand
Intermediate	Mar' 20 – May' 21
PCM; Percentage: 83.4%	
PVSS D.A.V Public School	Koderma, Jharkhand
Matriculation	Mar' 18 – May' 19
Percentage: 88.8%
